

## AA2. MATERIALS FOR SPEAKING SKILLS PRACTICE

### 1. Record yourself reading this text.

That had been a horrible night at work. Lots of patients had arrived with different types of injuries caused by the accident on 45th street and the 7th avenue. Although her shift had finished two hours ago, she was still there. She needed to go for a walk in the open air, just turn the corner and get a coffee at Mel's. Maybe some pastries. They were home-made, not like the ones Peter brought last week to celebrate his birthday, ugh! That day they all had to go to the toilet several times. Peter said he had bought them in a shop of his neighbourhood. How could he live there? If she were a doctor she would never live in that area of the city. She began to walk thinking that she needed also to write an email to her cousin in Florida. Miami, sun, beach.....Lucky her!

### 2. Have a look at these photographs. Pay attention to the specific ones that apply to your type of engineering:

**Industrial Organisation Engineering**

**Telecommunications Engineering**

**Computer Engineering**

**3. Answer the following questions orally. You do not have to repeat the question, just record your answers.**

- Describe the two photographs of your engineering specialisation.
- What, in your opinion, have been the most interesting developments of your field these last years?
- Can you suggest any future applications?
